Resolutions.

NOTE.—Bills and resolutions, simple, concurrent, and joint, are not catalogued directly, except in the rare cases where a special edition is printed for general distribution. The catalogue entries for the committee reports on them embody the exact title of the bill, and serve as complete substitutes for cataloguing the bills themselves. The following directions refer to these report entries as equivalent to bill entries. Considering bills and resolutions in 4 classes, class 1 are the large number which are presented to Congress, but on which no committee report is made, and which do not become law. Class 2 are the very few on which no committee reports, but which become law notwithstanding. Class 3 are those on which a committee reports but which fail to pass. Class 4 are those on which a committee reports and which become law thereafter. For class 1 consult the index of the Congressional record. Classes 2, 3, and 4 can be found under the subject of the bill, and classes 3 and 4, by reference, under the committee and the Senator or Representative making the report. Classes 2 and 4 have appended to the entries the pages in the Statutes at large where the text of the bill passed into law can be found.
